

PROCESS ENGINEER (TECHNOLOGY / POLISHING)

RESPONSIBILITIES

- Perform semiconductor process engineering in the area of silicon wafer polishing
- Coordinate troubleshooting of process issues and yield losses
- Continuous process improvement as to quality, throughput, cycle time and costs
- Perform new processes and consumables qualifications
- Statistical data analysis for process improvement

REQUIREMENTS

- Degree in any Engineering field
- Knowledge of programming knowledge and Excel macro will be an advantage
- Good analytical, communication and teamwork skills

SILTRONIC AG

Siltronic is one of the world's largest manufacturers of hyperpure silicon wafers and partner of many leading semiconductor companies. The company employs around 3,800 people. The company has a network of state-of-the-art production sites in Asia, Europe and the USA. Siltronic develops and manufactures silicon wafers in diameters of up to 300mm. These are the basis for modern microelectronics and nanoelectronics.
