

## Press Release

Siltronic AG  
Hanns-Seidel-Platz 4  
81737 Munich  
Germany  
[www.siltronic.com](http://www.siltronic.com)

### **Siltronic included in MDAX**

**Munich, Germany, September 24, 2018** – Siltronic's shares have been listed in the MDAX as of today and will thus become a member of the second most important index of the German stock exchange. The restructuring of the most important German stock exchange indices by the Deutsche Boerse has amongst others eliminated the separation of technology and traditional industrial companies. The listing of Siltronic shares in the TecDAX remains unchanged.

"We are very pleased that Siltronic's shares have been included in the MDAX and welcome the removal of the previous separation between the technology and industry sectors. The inclusion in the second most important German stock market index will further increase the level of awareness of our share among institutional investors, which will benefit both the company and our investors," says Dr. Christoph von Plotho, CEO of Siltronic AG.

Siltronic shares have been listed on the Frankfurt Stock Exchange since June 11, 2015 and have been part of the TecDAX since December 21, 2015. As of today, they will be traded in both the MDAX and TecDAX. You can find further information on the Siltronic share on the company website

**Company profile:**

Siltronic is one of the world's largest manufacturers of hyperpure silicon wafers and partner to many leading semiconductor companies. The company operates production sites in Asia, Europe and the USA. Siltronic develops and manufactures silicon wafers in diameters of up to 300 mm. Silicon wafers form the basis for modern microelectronics and nanoelectronics and are a key component in semiconductor chips driving computers, smartphones, navigation systems and many other applications. Siltronic AG employs around 4,000 people and is a stock-listed company in Germany (Prime Standard). The shares of Siltronic AG are part of the two indices MDAX and TecDAX.
