Dr. Rupert Krautbauer succeeds Petra Mueller as Head of Investor Relations & Communications at Siltronic AG

Germany, Munich, August 2, 2021 – Effective November 1, 2021, Dr. Rupert Krautbauer will take over as Head of Investor Relations & Communications at Siltronic AG, with responsibility for global communications with investors, analysts and the press, as well as for internal communications. Petra Mueller is leaving the company at her own request to take on a new professional challenge.

Rupert Krautbauer holds a PhD in physics and studied at the LMU Munich and the University of Nottingham (UK). He has held various positions at Siltronic AG since 2003, including Director Marketing and most recently Vice President Technology at the Singapore site. He has many years of management experience and has a deep insight in Siltronic AG.

Petra Müller joined Siltronic AG in November 2015 shortly after the company's IPO and took over as head of the division she built from scratch.

"We would like to thank Mrs. Mueller for her outstanding work over the past six years. She has made a very significant contribution to the professional appearance and positive image of Siltronic AG on the capital markets and in public and has been very consistent in developing our internal communications," said Dr. Christoph von Plotho, CEO of Siltronic AG. "We respect her wish to take up a new position in her home region and thus close to her family, and sincerely wish her all the best for the future.

We are very pleased that we have found a competent successor within our company. Rupert Krautbauer has already been doing excellent work for us for many years. He knows the semiconductor industry very well and is very familiar with our markets and technologies. We wish Dr. Krautbauer all the best and much success in his new role."

Company profile:

Siltronic is one of the world's largest manufacturers of hyperpure silicon wafers and partner to many leading semiconductor companies. The company operates production sites in Asia, Europe and the USA. Siltronic develops and manufactures silicon wafers in diameters of up to 300 mm. Silicon wafers form the basis for modern microelectronics and nanoelectronics and are a key component in semiconductor chips driving computers, smartphones, navigation systems and many other applications. Siltronic AG employs around 3,900 people and is a stock-listed company in Germany (Prime Standard). Siltronic shares are included in the SDAX and TecDAX.
